

Replace your appliances with “energy star” rated appliances

Background

Energy Star ratings tell you how energy efficient your appliances are. The more efficient they are, the higher energy star rating they will have and the less energy they will use.

- Visit [The Consumer's Guide to Energy Efficiency](#) and [Energy Star's official website](#) for more info on how to purchase energy efficient appliances, and [Chugach Electric's website](#) for other appliance purchasing tips.

- [Greener Choices by Consumer Reports](#) offers charts of the best model appliances for energy efficiency and offers other tips for pursuing energy efficiency.

Carbon Savings

One-third of your home's energy costs can be saved by making your home more energy efficient. (Source: Al Gore)

- REMEMBER: Every appliance you buy has a large amount of carbon emissions already associated with its production. Think carefully on whether your old appliance is really ready to be replaced before buying a new one.

Take Action Now!
